HOSTING IN VANCOUVER
CANADA'S LARGEST DATA CENTER OF DATA PROTECTION

WHY IS DATA PROTECTION SO IMPORTANT?

- Businesses are increasingly under pressure to protect data and ensure privacy of information for their customers.
- Data protection laws and international privacy standards typically have trouble keeping up with ever-demanding consumer expectations and company growth.
- Without proper protection, businesses only have a limited understanding of data protection standards and therefore leave data vulnerable to exploitation.

DATA PROTECTION BY THE NUMBERS

- In 2022, 68% of Canadian companies ranked customer privacy protection as a very high priority.
- From 2019 to 2022, the average breach cost in Canada rose by 21% to $7.647 million CAD per breach, making data protection a top priority for most businesses in Canada.

DATA RESIDENCY

- In Canada, there are data residency and sovereignty laws that have been in place for over two decades.
- Companies must use a data center that complies with the regulations and laws of the country in which their business must operate.

ADVANTAGES OF STORING DATA IN CANADA

- Colocation in Vancouver, Canada, has become one of the most popular cities in Canada.
- ServerMania’s state-of-the-art facility in Vancouver not only protects valuable corporate and customer data on their premises, but it also provides reliable network quality, connectivity, and speed.
