

AraCloud

BY SERVERMANIA

The Cloud, Simplified

AraCloud, powered by ServerMania, is a cloud platform built to make powerful, scalable infrastructure accessible to everyone. We designed AraCloud with a focus on simplicity, performance and flexibility to empower businesses of all sizes.

Startups can launch projects quickly and scale effortlessly, while enterprises benefit from a robust and secure environment that supports complex needs. With seamless scalability, enterprise-grade security, and an intuitive management portal, AraCloud takes the hassle out of cloud management, so you can focus on what really matters—growing your business.

To a user, AraCloud is a platform for quickly deploying powerful virtual machines. Each virtual machine is a complete server environment with an operating system, root access, and the ability to install software.

Cloud servers can be launched in seconds via AraCloud's intuitive interface or a full-featured API. Additionally, users only pay for the resources they use, making AraCloud the ideal platform for variable workloads and rapid scaling.

Combining powerful enterprise-grade rackmount servers, virtualization technology, innovative control interfaces, and advanced server resource distribution.

Key Features of the Cloud

AraCloud, powered by ServerMania, is designed with features that make managing your cloud simple, efficient, and secure. From seamless scalability to an intuitive interface, our platform supports businesses of all sizes. Explore what sets AraCloud apart and see how it can power your next big idea.

CLOUD SIMPLIFIED

Seamless Scalability

Effortlessly scale your cloud resources to match your business demands. AraCloud's pay-as-you-grow model allows you to adjust CPU, memory, and storage with just a few clicks, ensuring you only pay for what you use.

Unified Management Portal

Manage your entire cloud infrastructure effortlessly through AraCloud's intuitive, user-friendly interface. Our easy to use control panel gives you access to a comprehensive and full-featured cloud. With a single console for compute, storage, and networking, navigating complex setups has never been easier.

Enterprise-Grade Security

Safeguard your data with our multi-layered security approach, including advanced encryption, continuous monitoring, and compliance with standards such as GDPR and HIPAA. AraCloud's protection protocols ensure your infrastructure and data remains secure.

High-Performance Storage

Leverage high-performance SSD and NVMe storage for optimal speed and data accessibility. AraCloud's infrastructure is designed to support demanding applications and databases, providing the fast, reliable performance your business needs.

Redundancy Across the Board

Built for reliability, AraCloud offers a 100% network uptime SLA backed by a resilient infrastructure with automatic failovers and 5x data replication. With our self-healing cloud, your operations run smoothly and without interruption, even during peak loads.

Transparent Billing and Cost Efficiency

Keep your cloud expenses under control with AraCloud's transparent billing. Our flexible pricing models, including pay-as-you-grow, ensure cost-efficiency and scalability. With no up-front hardware or staffing costs, AraCloud is the perfect option for businesses looking to streamline costs.

Effortless Migration

Transition to AraCloud with ease using our custom template upload feature. Preserve your existing configurations and streamline the migration process, ensuring a smooth and hassle-free switch from other providers.

Flexible API and Automation

Integrate with your existing systems and automate your workflows using our comprehensive API. With support for infrastructure as code, containerization, and CI/CD, AraCloud enables seamless management and rapid deployment of your cloud environments.

True 24x7 Support

Our support is always available via live chat, phone and email to assist you around the clock. Our team has the tools and experience to help guide you to cloud server success and always respond in 15 minutes or less to any support request.

Tailored Solutions for Every Business

From startups to large enterprises, AraCloud offers customizable solutions that cater to your unique needs. Whether you're launching a new application or managing complex IT infrastructures, our team of cloud experts is here to help you build a cloud strategy that empowers your business growth.

Choose Your Cloud

Public cloud

Our Public Cloud is our most versatile and accessible cloud solution. With pre-configured servers, our Public Cloud is designed for everything from testing and development to full-scale production environments.

Enjoy the benefits of a fully-featured cloud environment with transparent pricing, powerful automation tools, and seamless integration capabilities.

Private Cloud

Launching Soon

With our Private Cloud, you'll have the ability to customize your cloud setup to meet stringent compliance requirements, manage sensitive data, and integrate seamlessly with existing systems.

Our Private Cloud is ideal solution for enterprises seeking a bespoke cloud environment that combines the flexibility of the cloud with the privacy and control of dedicated hardware.

Public Cloud

Fast, Flexible, and Scalable

Pre-Configured servers range from economical dual-core virtual machines with 4 GB of RAM and 50 GB of storage to 32-core powerhouses, 256 GB of RAM, and 4.5 TB of storage.

A Comprehensive API Built In

For companies with smaller server deployments, our AraCloud control panel offers an intuitive interface for deploying, configuring, and scaling cloud servers.

For customers with more advanced requirements, the AraCloud Public Cloud offers a comprehensive API. The API can be used to integrate your public cloud network with existing systems and third-party services, including infrastructure management, monitoring, continuous integration and testing, and automated scaling.

A Cloud Plan for Every Need

AraCloud offers a range of Public Cloud plans designed to support businesses of all sizes and industries. Whether you're launching a new application, running complex workloads, or expanding your operations, AraCloud's Public Cloud delivers the performance, reliability, and pricing options that work for you.

Compute

Tailored for compute-intensive applications, this plan is built for handling tasks such as large-scale data analysis, scientific modeling, and batch processing. Get fast, reliable processing power at your fingertips.

Memory

Designed for memory-intensive workloads, this plan provides high RAM capacities for real-time analytics, databases, and in-memory caches. Optimize your applications with rapid access to large datasets.

Storage

Focused on delivering secure and scalable storage options, this plan is ideal for businesses that need extensive storage for data archiving, media files, or backups.

Flex

Ideal for businesses needing a balanced cloud environment, the Flex Plan combines compute, memory, and storage to handle a variety of workloads. Perfect for development and production environments alike.

Private Cloud

Secure, Custom, and Dedicated

AraCloud Private Cloud solution is designed for businesses that need full control over their infrastructure, with dedicated resources, enhanced security, and customizable configurations. Our Private Cloud combines the convenience of cloud servers with the reassurance of dedicated hardware.

COMING SOON: TAILORED CLOUD SOLUTIONS FOR YOUR BUSINESS

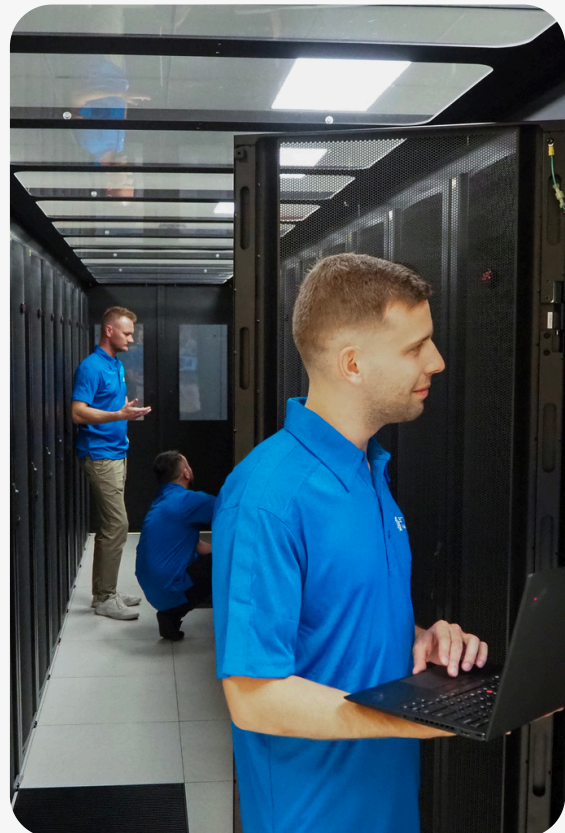

Based in New York

Our data center is a Tier 4 facility, delivering the most redundant infrastructure across all system components including power, networking, and cooling.

Our public and private cloud platforms are based in a state-of-the-art data center in the New York City Metro area with multi-homed fully redundant connections to multiple bandwidth providers.

Premium 24x7 Support

Unlike other cloud providers that leave you to figure things out on your own, ServerMania is committed to being there every step of the way.

World Class Support

We offer first-class support to all our cloud users. Our support team is available around the clock, ensuring you have access to expert assistance whenever you need it.

With an average response time of 15 minutes, you can count on us to resolve issues quickly and efficiently.

Reach out in whatever way suits you best—submit a ticket to our online support system, email us, use our live chat, or give us a call.

Reliability, Guaranteed

AraCloud is built for stability and performance, with every component designed to ensure your operations run smoothly.

From servers and power to storage and network connections, we have multiple layers of redundancy in place. If something goes wrong, our fail-over systems kick in automatically, keeping your services up and running without interruption.

Simplifying the Cloud and Empowering Your Growth

AraCloud offers the flexibility, performance, and reliability you need to grow your business with confidence.
