

# MANAGED COLOCATION

ServerMania colocation is used by businesses that prefer to buy and manage their own hardware, while enjoying the cost-savings and efficiency benefits of outsourcing data center construction and management to us.

A leader in web hosting since 2002.

# COLOCATION CATALOG

ServerMania's colocation services allow businesses to host their owned hardware in our world-class green data centers.

Colocation customers who colocate hardware in ServerMania's cutting-edge Montreal, Buffalo, New York City Metro, Los Angeles, or London data centers, benefit from the same reliability and connectivity that support ServerMania's industry-leading bare metal and cloud server hosting solutions.

ServerMania colocation is used by businesses that prefer to buy and manage their own hardware, while enjoying the cost-savings and efficiency benefits of outsourcing data center construction and management to us.

Our colocation services are designed for small and medium businesses. Unlike many colocation providers, we're happy to host hardware ranging from a single server to multi-cage deployments capable of supporting the largest applications.

## **SERVERMANIA COLOCATION CUSTOMERS GAIN:**

- ✓ Inexpensive access to industry-leading data center facilities
- ✓ Excellent connectivity throughout North America and Europe
- ✓ A 100% Network Uptime guarantee
- ✓ The support of ServerMania's experienced data center management team
- ✓ A central location: all colocation data centers are within easy reach of major airports

# WHY CHOOSE SERVERMANIA?

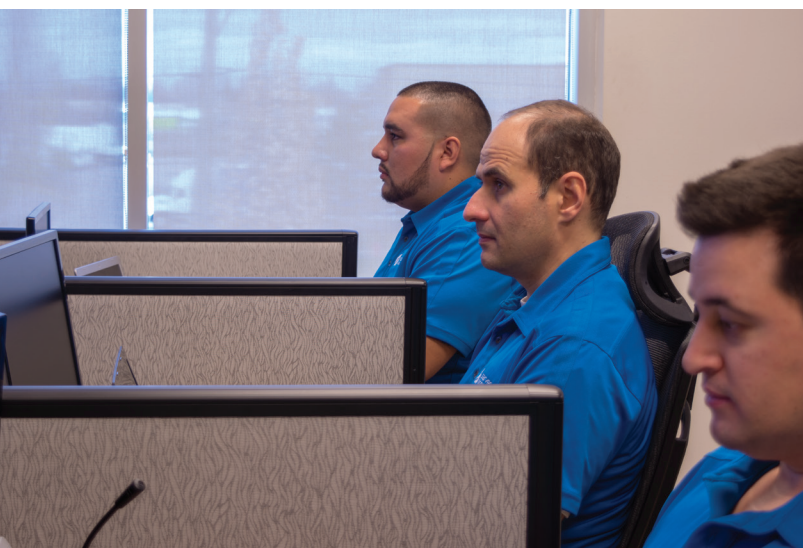

Founded in 2002, ServerMania has been building infrastructure hosting solutions for many years. We understand what businesses need from their colocation provider: responsive support, absolute reliability, and the best possible connectivity.

ServerMania's dedication to fulfilling the expectations of our colocation customers can be summed up in two promises: our 100% Uptime Guarantee and our 15-minute support response times.

We're so confident of our team and networks that we're happy to provide a 100% uptime Service Level Agreement. In the extremely unlikely event an issue causes downtime, we pay significant compensation.

Our North-American support teams are available round-the-clock, every day of the year. ServerMania support has an industry-leading response time of 15 minutes, so you'll never be left waiting.

Thousands of brands entrust mission-critical hardware to ServerMania. Our low levels of customer churn and high levels of customer satisfaction are a testament to the ServerMania team's dedication to providing unparalleled support to every customer.

# COLOCATING IT INFRASTRUCTURE WITH SERVERMANIA

ServerMania's colocation data centers are state-of-the-art, secure, efficient facilities. Each offers redundant fiber connectivity to multiple Tier 1 bandwidth providers.

## Hardware Deployment

Our data centers are capable of supporting server deployments of any size. We will work with you to choose the best colocation option. As your needs change, our team can help you quickly scale your data center resources.

ServerMania understands that sometimes you'll need to move fast, and we're able to provide rush delivery when required

## Flexible Colocation Options

We accept collocated hardware deployments of any size. For customers with modest colocation needs, our "Pay Per Unit" plans can accommodate up to five rack units of equipment.

For more extensive deployments, we provide Private Cabinet plans with up to 42 rack units of space. Private Racks provide power connections, network drops on-demand and include basic management support.

For large hardware deployments that require complete security and control, we offer custom cages. We work with customers to create custom cage colocation hosting environments to their specifications.

## Green Colocation

ServerMania is committed to responsible use of our planet's resources. Both of our colocation data centers run almost entirely on sustainable hydroelectric energy. Sustainable power helps colocation customers reduce their carbon footprint while benefiting from inexpensive energy.

# DATA CENTER LOCATIONS

Our next-generation data center facilities allow businesses to grow without constraint.

## NEW YORK CITY METRO

Developed from the ground up with a focus on low-latency connectivity and high redundancy, ServerMania's NYC Data Center is a 360,000 sq ft. tier 4 data center located in the heart of New York City Metro.

- 360,000 sq. ft. of total space
- Carrier neutral
- High bandwidth capacity
- Tier 4 data center

## BUFFALO

With direct fiber connections to both New York City and Toronto, this strategically-located facility is guaranteed to give you an awesome return on your investment.

- Hydro-electric capabilities
- Tier 1 network providers
- Central location
- Excellent Connectivity

## LOS ANGELES

ServerMania's Los Angeles data center delivers unparalleled connectivity for businesses looking to reach users in the United States as well as Asia. This south-western location features direct conduit access to 1 Wilshire's Meet-Me-Room.

- 22,000 Sqft Data Center
- Redundant power connections
- Low-latency connectivity to Asia
- Secure design

## MONTREAL

This Tier 3 data center has the capacity for up to 4000 cabinets, 50 Megawatts of power, and 9 data halls. With unmatched capacity, our Montreal facility gives your business the room to scale to any size.

- Innovative PoD Design
- Central location
- Power Ready
- Disaster Ready

## LONDON

ServerMania's London data centre delivers exceptional connectivity to Europe and beyond. This Tier-4 data centre is double redundant across all power, networking, and cooling.

- Tier 4 facility
- N+N power redundancy
- Optimized for Europe, Africa, and the Middle East
- High bandwidth capacity

# WHY COLOCATION?

Many of our colocation customers migrated infrastructure hosting from on-premises data centers or server rooms they owned and managed. A major benefit of colocation is access to enterprise-grade infrastructure at a fraction of the cost.

It is beyond the capabilities of all but the largest businesses to build facilities as secure, reliable, and connected as ServerMania's data centers.

But by outsourcing data center construction, management, and maintenance to us, colocation customers benefit from incredible economies of scale. ServerMania colocation offers the best in modern data center facilities at a fraction of the cost of building and managing a less capable facility in-house.
