Effortless backup and restore with intuitive management interface.

PROTECT YOUR DATA

Real-time backup

You will have access to all business data including individual files, partitions, drives, and entire servers with bare metal restores.

Fast data restores

Restore your data in seconds in the event of data loss incident. With lightning fast access to data, you can run backed-up virtual machines without time-consuming data transfers.

Fully compatible with all types of data

Compatible with Windows, Linux & MacOS desktops and servers, iOS & Android mobile devices and virtual machine and database formats.

Protects from suspicious activity

Monitoring & blocking suspicious changes to data and backups.

Remote offsite backups

Remote offsite backups in a secure location protect your data. Data is encrypted while in transit and at rest in SSAE certified data centers.

With cloud backup

Tesla’s server was hacked and highly sensitive data exposed.

Equifax breach

Affected 145 million consumers.

City of Atlanta

Hackers demand 0.8 Bitcoin per computer.

Other high-profile victims:

HIGH PROFILE

Cybercrime widespread globally.
