

# DEDICATED

## SERVERS

ServerMania dedicated servers are the most powerful and flexible server hosting option available. Each dedicated server is a single rackmounted machine constructed with enterprise grade components selected for optimal performance.

A leader in web hosting since 2002.

# DEDICATED SERVER CATALOG

**ServerMania is a trusted provider of server hosting to thousands of businesses. With data centers throughout the US, Canada and Europe, ServerMania's mission is to provide the best in flexible server hosting, managed services, and support.**

ServerMania customers benefit from enterprise-grade infrastructure and services without enterprise prices.

ServerMania dedicated servers are the most powerful and flexible server hosting option available. Each dedicated server is a single rack-mounted machine constructed with enterprise-grade components selected for optimal performance and reliability by ServerMania's team of experienced engineers.

Dedicated servers are the most cost-effective option for long-running or performance-dependent workloads.

ServerMania supports a wide-range of applications on dedicated server hardware, including Software-as-a-Service, high performance eCommerce, high-traffic web hosting, big data and machine learning, finance and data science, high-performance computing, and game server hosting.

# DEDICATED SERVERS FROM SERVERMANIA

ServerMania hosts an expansive range of dedicated server hardware, from economical servers perfect for small business applications to powerful dual-processor, 24-core machines that support up to a full terabyte of RAM.

**Server hosting customers can deploy dedicated servers in any of ServerMania's data center locations, including:**

MONTREAL, QC

BUFFALO, NY

LOS ANGELES, CA

DALLAS, TX

AMSTERDAM, NL

AUCKLAND, NZ

NEW YORK, NY

LONDON, UK

Dedicated servers can be customized to meet the needs of each customer. In addition to location, custom options include processor, RAM, storage (HDD or SSD), operating system, and control panel.

ServerMania chooses only the most reliable components. Our dedicated servers are built with SuperMicro rackmount chassis and the latest Intel processors.

# DEDICATED SERVER TYPES

## Custom Dedicated Servers

Servermania Dedicated Servers can be customized to meet the needs of your business. Choose from a wide variety of base configurations before customizing the hardware and software for your applications.

# SERVER MANAGEMENT

ServerMania management services are available to customers who would like to use our team's expertise for day-to-day server management.

With over a decade of experience building, hosting, and managing servers for small and medium businesses, we understand that some dedicated server customers prefer to focus on their business, not on managing their servers.

**We provide two tiers of managed services: Essential and Empowered.**

## ESSENTIAL SERVER MANAGEMENT

Our Essential linux server management package includes 24x7x365 server monitoring with guaranteed human intervention in under 15 minutes. Our server operations team will monitor common and user defined ports for connectivity. In the event of a report from our custom monitoring platform of a service outage, our server administrators will follow your instructions precisely to ensure service is restored as quickly as possible.

## EMPOWERED SERVER MANAGEMENT

Get complete peace of mind with our Empowered linux server management plan. Including proactive monitoring, security management, and unlimited support requests, this is the perfect choice for businesses looking for a comprehensive and experienced linux server management team.

We're here 24x7 to ensure flawless performance and reliability for your servers.

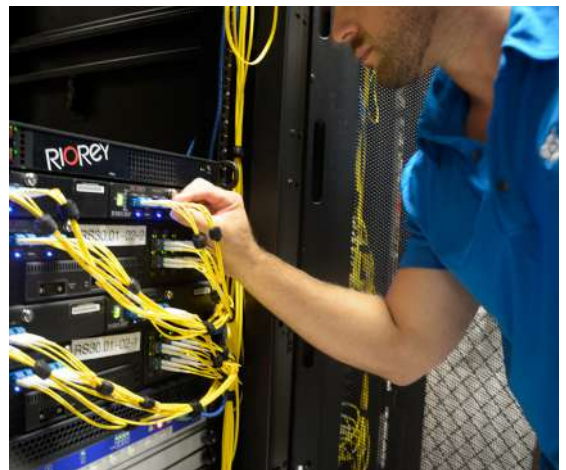

# THE SERVERMANIA ADVANTAGE

## 8 reasons why thousands of smart companies use our server hosting plans:

### 1. Save time

You want a fast and easy to use solution for your next server project. But sourcing, building, and maintaining servers takes precious time away from what is most important to you - running your business.

Our entire job is to find the best enterprise-grade servers to accomplish your goals. We live and breathe servers. Let us do the heavy lifting so your time is spent on your business, not building servers.

### 2. Save money

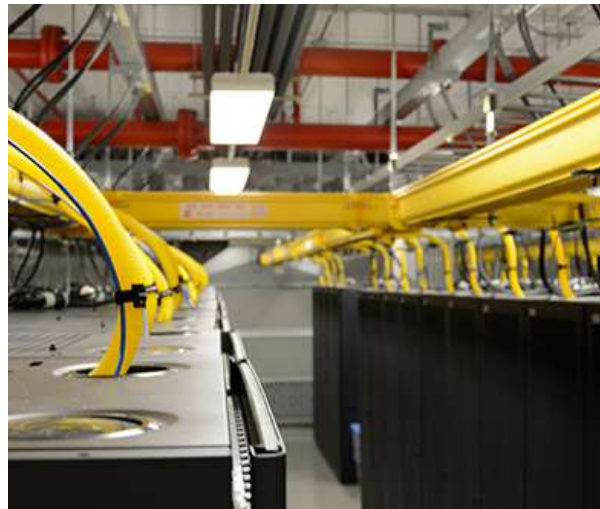

Enterprise-grade servers that deliver the best uptime and performance are expensive. Building these servers and keeping up with hardware replacements can cost thousands of dollars per server. On top of that, you need **staff on-site 24x7 to support these machines.**

When you choose ServerMania, we take care of all of that. You pay us a fixed server rental fee, and we manage the entire server build and maintenance process.

### 3. Improve performance and uptime

Nothing kills customer confidence and business resources more than downtime. That's why you need a server partner that can deliver maximum uptime and performance.

With a 100% network uptime SLA and fully redundant power, networking, and cooling - you can rest assured that your servers will be online when you need them.

### 4. Reach a global audience

In order to deliver your web content to a global audience at blazing fast speeds, you need a partner with a data center presence in every corner of the world.

ServerMania's 6 data centers are optimally spaced throughout the world to reach a global audience and 10Gbps connections deliver content faster than ever possible.

### 5. Trusted by thousands

Your business deserves a trusted partner that has years of experience delivering servers to businesses both small and large.

Since 2002, ServerMania has been the trusted server providers to some of the world's largest companies. Our clients include Comodo, AVG, Symantec and Sendlane just to name a few.

"ServerMania's 24/7 support service is outstanding. I haven't seen any other provider even coming close. ServerMania always approaches problems with a positive manner. Every staff member I have encountered always made me feel that I was their priority."

**COMODO**

## 6. Personalized service

There's nothing worse than being treated as just another number and talking to providers who have no idea who you are or what servers are right for your business.

That's why ServerMania is focused on delivering a custom and personalized server experience. Your **dedicated Account Manager** will work with you on any problems you may have and provide you with a single point of contact for growing your business with us.

## 7. 24x7 support

Some large providers think that access to great support should be an extra charge and hidden behind a difficult to navigate control panel.

Not so with ServerMania - you have access to our 24x7 expert support team at any time using live chat, phone, and email. We also have **15 minutes or less response times** guaranteed.

## 8. Access to the latest hardware

Delivering a reliable experience to your users requires the latest top of the line servers. But upgrading servers and investing in reliable enterprise-grade hardware is costly and time consuming.

With ServerMania, you always have access to the latest **Xeon processors backed by industry trusted Supermicro components**. Instead of spending thousands on hardware, you can always order a server for one single monthly fee.

# WHY SERVERMANIA?

ServerMania is the trusted server hosting provider of thousands of brands, providing the infrastructure that supports businesses from boutique eCommerce stores to the largest enterprise apps and services.

Many of our customers have been with us for years. We are a trusted partner, empowering server hosting customers with unparalleled support, cutting-edge infrastructure, and our commitment to building tailored solutions that fit the unique needs of each customer.
